

East Kazakhstan. Kyrykungir. Ornamented ceramic vessel

10 cm

Description

A vessel of a medium size and a complex profile. The body is divided into two areas by shoulders, probably due to application. Neck area is profiled but inward, the rim is slightly inverted. The lower part of the body is smoothed, narrowed to the bottom. The bottom is flat. In the transit and middle zone of the body, there is a geometric ornament in the form of shaded triangles and combed decorations.
